DETAILED ACTION

Double Patenting

1. Claims 1-74, 80, 86, and 92 of this application conflict with claim 1-74, 80, 86, and 92 of Application No. 10/329889. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-74, 80, 86, and 92 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-74, 80, 86, and 92 of copending Application No. 10/329889. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-116 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-145 of copending Application No. 10/442882. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the present application do not require a separate loop fastener, but rather the hook fasteners are

Art Unit: 3761

attached to the fabric surface of the topsheet or backsheet. It would have been an obvious matter of design choice to modify the fasteners of the present application to eliminate the loop strips and have the hook fasteners fasten to the topsheet or backsheet surface, since applicant has not disclosed that having the hooks fasten to the topsheet or backsheet surface solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with the loop strip or using the fabric surface as attachment means.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
